2. Project Overview
3. End Users
4. Tools and Technologies
5. Portfolio design and Layout
6. Features and Functionality
7. Results and Screenshots
8. Conclusion
9. Github Link

PROBLEM STATEMENT

Many beginners and developers struggle to present their skills and projects effectively. A personal portfolio website solves this problem by showcasing achievements, projects, and contact information in one place.

PROJECT OVERVIEW

This project is a personal portfolio website built with HTML, CSS, and JavaScript to showcase my skills, projects, and contact details. It features a clean layout with sections for Home, About, Projects, and Contact, along with interactive elements like dark mode and a dynamic date display in the footer.

WHO ARE THE END USERS?

Recruiters
Employers
Classmates/Peers
Personal network

TOOLS AND TECHNIQUES

HTML5
CSS3
JavaScript
GitHub (for deployment &
version control)

POTFOLIO DESIGN AND LAYOUT

Header with navigation (Home,
About, Projects, Contact)
Sections for About, Projects, and
Contact
Footer with copyright and date

FEATURES AND FUNCTIONALITY

Responsive design
Dark mode toggle)
Dynamic date in footer
Links to GitHub and
email

RESULTS AND SCREENSHOTS

Website runs successfully in
browser
Sections load correctly
Dark mode works as expected
Footer updates with today's date

CONCLUSION

A portfolio website was successfully created to present skills and projects. It is simple, responsive, and has interactive features (dark mode & date). Future improvements can include animations, project filtering, and form-based contact.
